

Marco Flores

Aspiring Full Stack Webdeveloper

606 Los Altos Drive
Chula Vista,, CA 91914
(858) - 248 - 9644
MarcoFlores1029@gmail.com

EXPERIENCE

UCSD Trilogy Full Stack Coding Bootcamp - Graduate

December 2021 - March 2022

Full Stack coding course at UCSD Extension that is funded by Trilogy.
Worked from HTML all through databases like Mongoose/SQL.

EDUCATION

Southwestern College, Chula Vista —

AUG 2016 - 2020

Took a variety of courses from Web Design, Physics, Philosophy, Psychology, Calculus, Public Speech, Japanese Language, Tagalog, Sociology, and Art.

UCSD Extension, San Diego — Boot Camp

December 2021 - March 2022

UCSD Full-stack Coding Bootcamp within a 3 month time period that gave experience with both front-end and back-end development.

PROJECTS

Happy Hour — App for looking for cheap drinks

GitHub: <https://github.com/MaestroLuu/Happy-Hour>

Deployed Link: <https://desolate-earth-02940.herokuapp.com/>

This app allows users to search for restaurants by zip code that have happy hour specials near that zip code.

Worked with a team of four and used Github to assign tasks and issues that needed to be addressed and finished. Was in charge of mostly backend server-side work with seeds, queries, and mutations. Also in charge of assigning roles using the project board on github along with updating issues.

Used: HTML, CSS, Javascript, Apollo, GraphQL, React, Mongoose, MongoDB, Heroku

SKILLS

HTML5 | JavaScript ES6+
| jQuery | React | CSS3 |
Bootstrap | MySQL |
Sequelize | NoSQL |
MongoDB | Mongoose |
Express | NodeJS |
Handlebars | Inquirer |
Insomnia | GraphQL | Jest

LANGUAGES

English

Help for Hire — App for looking for odd jobs

GitHub: <https://github.com/MaestroLuu/Help-for-Hire>

Deployed Link: <https://protected-taiga-32909.herokuapp.com/>

This app allows users to look for quick odd jobs that take a day or less and gives them a quick way to earn money during these tough covid times.

Worked with a team of three and used Github to assign tasks and issues that needed to be addressed and finished. Was in charge of mostly backend work with the models and schemas, along with some of the routes. Was also in charge of the project board in assigning issues and making sure they're closed.

Used: HTML, CSS, Bootstrap, Javascript, NodeJs, Sequelize, Handlebars

Covid-19 Testing Site Locator — App for looking for

COVID-19 Testing sites from a dropdown menu

GitHub: <https://github.com/MaestroLuu/Covid19-Testing-Site-Locator>

Deployed Link:

<https://maestroluu.github.io/Covid19-Testing-Site-Locator/>

This app allows users to look for COVID-19 testing sites in their city.

Worked with a team of four to create a website that allowed the user to search for a COVID-19 testing site in the State of California using a COVID-19 API. Was mostly in charge of the Javascript side of the project, along with creating issues and directing the project board.

Used: HTML, CSS, Javascript, W3 CSS, JQuery, API
